Hi Jill,

Just wanted to provide another update. As I continue to dig into the antidegradation language I'm quickly realizing there is quite a history on this conversation as it relates specifically to Leavenworth National Fish Hatchery. Therefore, I appreciate your patience as I continue to research the appropriateness of a Tier I vs. Tier II antidegradation determination. I will touch base with you again next week.

Hi Jill,

I just wanted you to know I haven't forgotten about you and the items I promised. Namely, the antidegradation language, any additional standard language we typically use as it relates to the compliance schedule that you may find helpful, and any additional information I can find on Well no. 6.

Meanwhile, have a great weekend!
